

EXO System Guidelines

IMPORTANT

EXO System is certified for use on vehicles with 2" hitch receivers **ONLY**.

Determine Hitch Size and Class

Measure the opening of the receiver to determine size. To see which Class your receiver is check the sticker on the side of the hitch. If there is no sticker and the hitch came pre-installed, check the vehicle's owner's manual under "Towing." You can also check with the dealership or manufacturer.

- 1 1/4"** 1.25" receivers are **NOT** compatible with EXO System
- 2"** 2" receivers are compatible with EXO System
- 2 1/2"** 2.5" receivers are **NOT** compatible with EXO System

EXO System Hitch Compatibility

EXO System is designed and tested to work with Class III & Class IV 2" hitch receivers.

Follow Fit Measurements

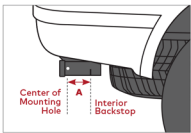

Because hitch receivers can be installed to the vehicle in many different ways it is important to check the provided fit measurements for compatibility. Find the products that fit your Class receiver and locate the A,B,C, and D measurements that associate with the product.

Hitch Measurements

Product	A	B	C	D	E
EXO SwingBase	3" Min.	5.5" Max.	8" Max. (15 1/4" w/StraightShot hitch extender)	10" Min.	1.5" Min.

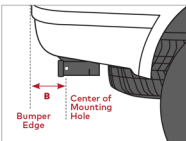

MEASUREMENT A

An obstacle inside or behind the hitch can be present.

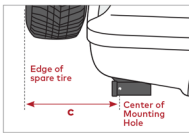

MEASUREMENT B

Make sure the bumper will not interfere with the hitch rack.

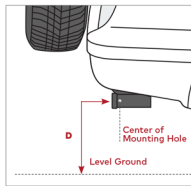

MEASUREMENT C

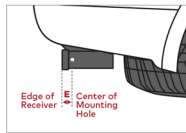

A spare-tire may interfere with the install of a rack.

MEASUREMENT D

MEASUREMENT E

NOTE: EXO SwingBase has 1 degree upward tilt to prevent sagging while under load.
