= < 1700mm

**Min 300mm
Max 610mm**

= > 1700mm

**Min 300mm
Max 910mm**

The buckle must close with firm resistance. If it closes too easily, or does not stay closed, adjust the red wheel accordingly until the buckle closes with firm resistance.

Die Schnalle muss mit einem deutlichen Widerstand schließen. Wenn sie zu leicht zu schließen ist oder nicht geschlossen bleibt, regulieren Sie die Gurtlänge anhand des roten Drehknopfs, bis die Schnalle mit deutlichem Widerstand schließt.

La hebilla debe cerrarse oponiendo una firme resistencia. Si se cierra con demasiada facilidad, o no se mantiene cerrada, ajuste la ruedita roja hasta que la hebilla quede firmemente cerrada.

La boucle doit se refermer avec une bonne résistance. Si elle se ferme trop facilement, ou ne reste pas fermée, régler la molette rouge de manière que la boucle se ferme avec une bonne résistance.

Spennen må lukkes stramt. Sørg for at den er ordentlig lukket, ellers vil den gå opp. Juster det røde hjulet inntil spennen lukkes stramt.

Feche a alavanca e ajuste a tensão da correia. A tensão da correia pode ser ajustada rodando o seletor rotativo em ambas as direções. A correia deve ser apertada o suficiente para evitar que o FatCat deslize sobre a barra transversal.

Закройте рычаг и отрегулируйте натяжение ремня. Натяжение ремешка можно отрегулировать поворотом маховичка в обоих направлениях. Ремешок должен быть достаточно плотным, чтобы предотвратить скольжение по перекладине FatCat.

La fibbia deve fare resistenza in chiusura. Se si chiude troppo facilmente o se non resta chiusa, regolare la manopola rossa finché la fibbia non fa resistenza in chiusura.

Zamknij dźwignię i dostosuj siłę docisku obejm. Siłę docisku obejm można regulować poprzez kręcenie pokrętkiem w obu kierunkach. Obejma powinna być na tyle mocno docisnięta żeby produkt HighRoad nie dało się przesunąć na belce.

Sklopte páčku a nastavte napětí popruhů. Napětí popruhů nastavíte otáčením kolečka v obou směrech. Popruhy slouží jako dodatečná ochrana před nechtěným klouzáním.

Sklopte páčku a nastavte napätie popruhov. Napätie popruhov nastavíte otáčaním kolieska v oboch smeroch. Popruhy slúžia ako dodatočná ochrana pred nechceným klúzaním.

Sluit de handel en pas de strap spanning aan. De strap spanning kan aangepast worden door aan het duimwiel te draaien in beide richtingen. De strap moet strak genoeg zitten om te voorkomen dat the HighRoad kan glijden over de dakdrager.

Stäng spaken och justera bandets spänning. Spännbandet kan justeras genom att vrida tumhjulet i båda riktningarna. Bandet ska vara tillräckligt spänt för att förhindra att HighRoad glider på takracket.

ROUND/SQUARE BAR • RUNDER/QUADRATISCHER TRÄGER • BARRA REDONDA/CUADRADA
