## HOOD ANCHORS

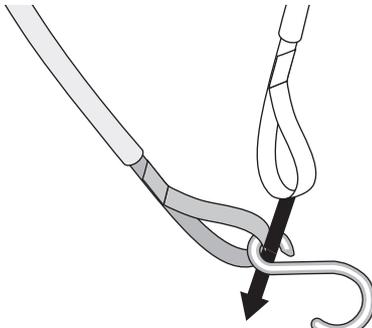

Bow and stern tie-downs are required when transporting boats. If your vehicle does not have a tie-off point or the tie-down would damage the vehicle, then Hood Anchor (Yakima part # 8007416) **MUST** be used. If these options do not work, please contact Yakima directly to discuss alternative solutions.

## 2 BOATS

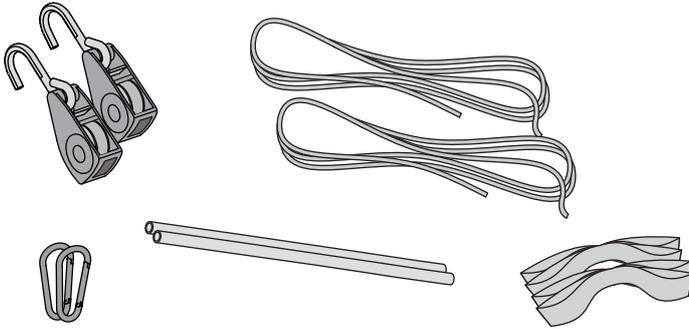

**REQUIRED ACCESSORIES:** To purchase any Yakima accessory visit [Yakima.com](http://Yakima.com) or contact your local dealer.

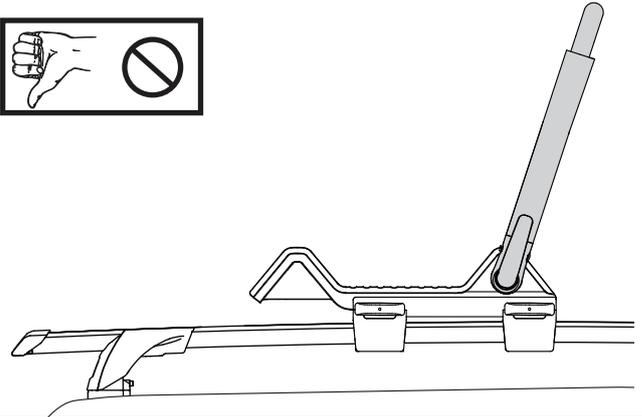

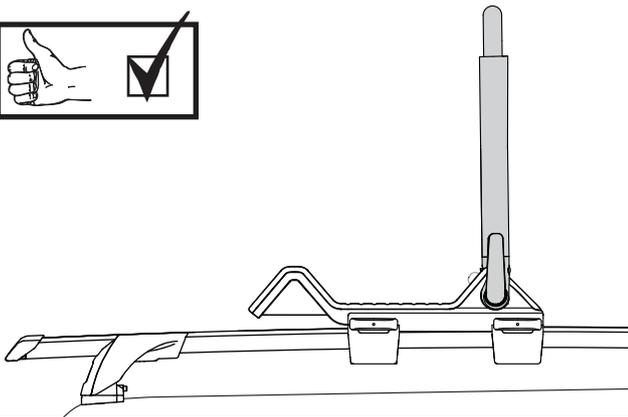

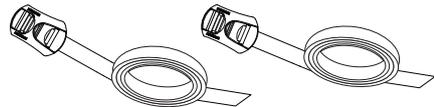

50kg/110 lbs. Max.

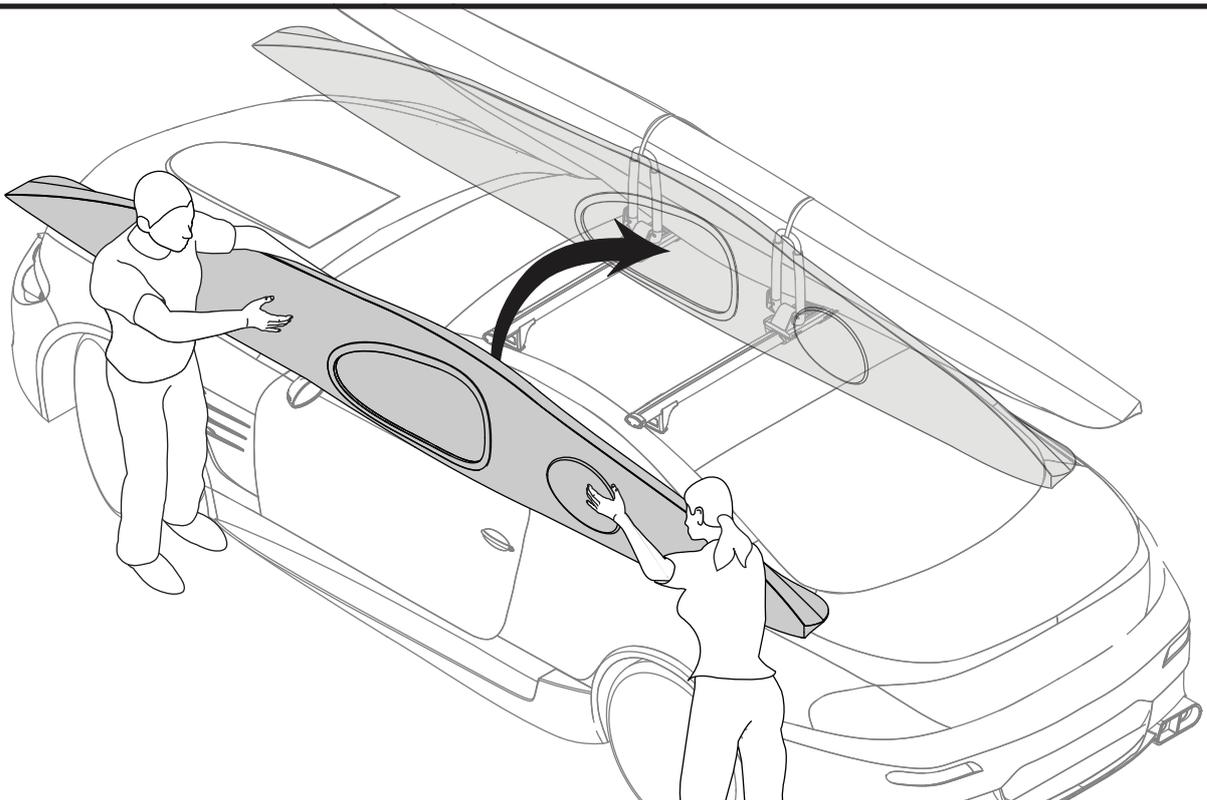

### Bow Stern Tie-Down #8004031

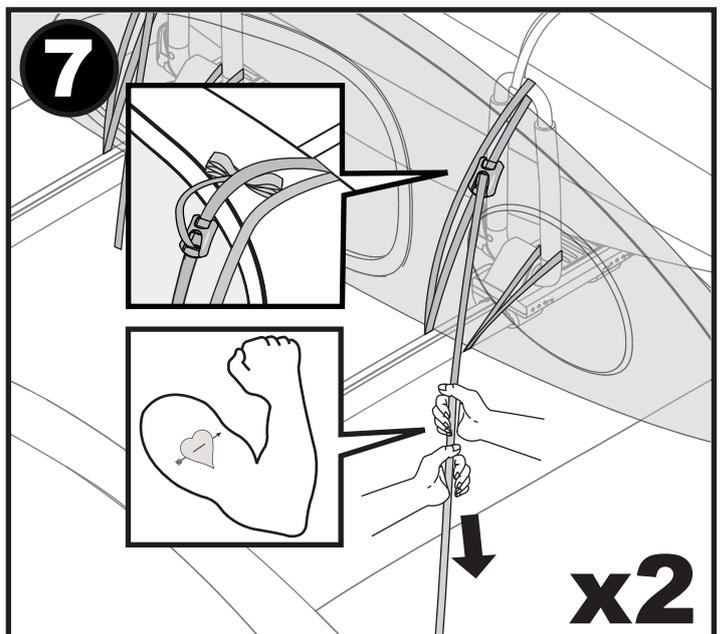

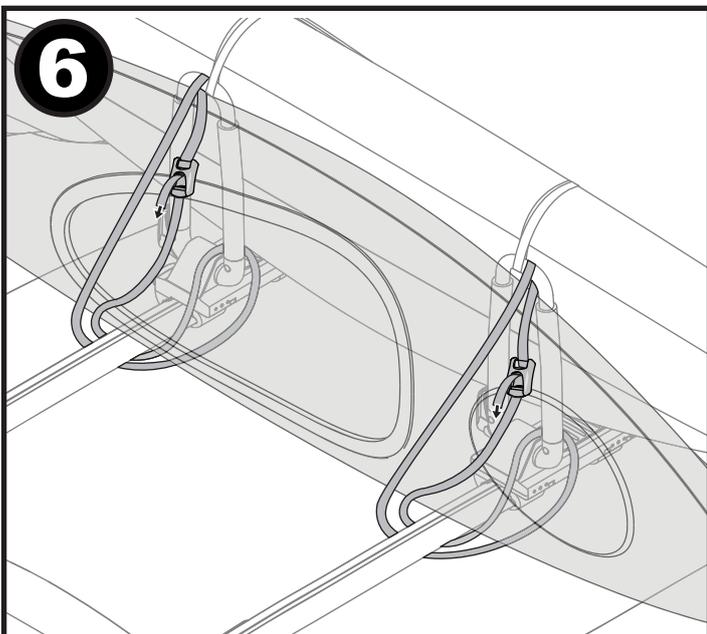

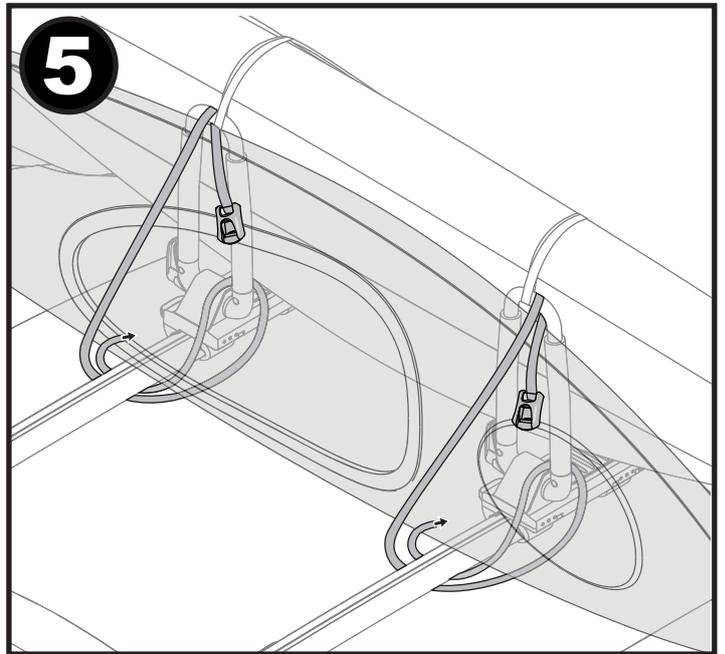

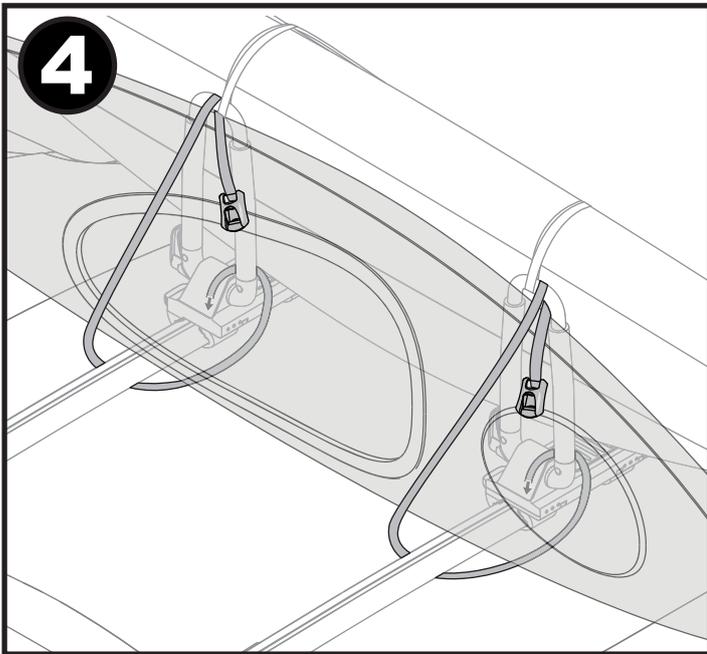

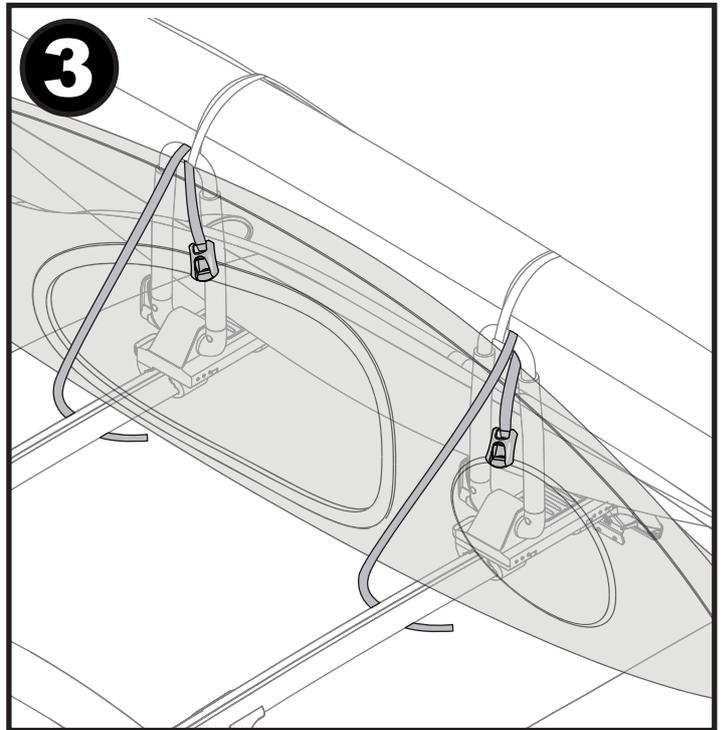

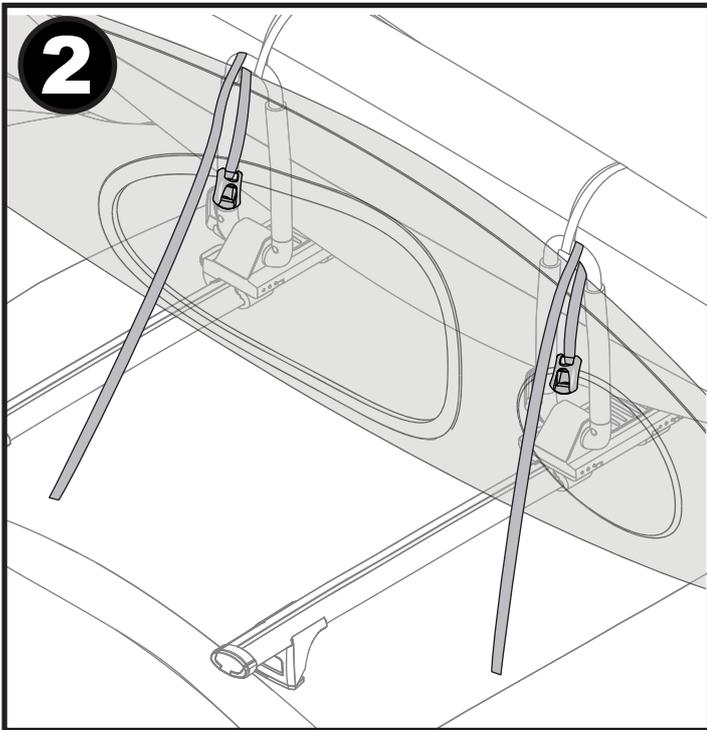

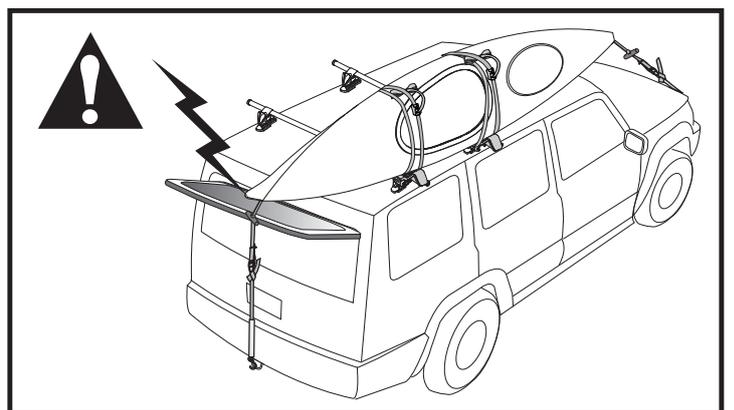

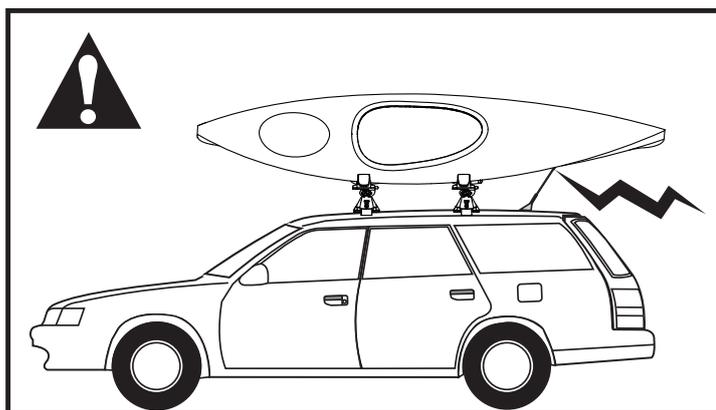

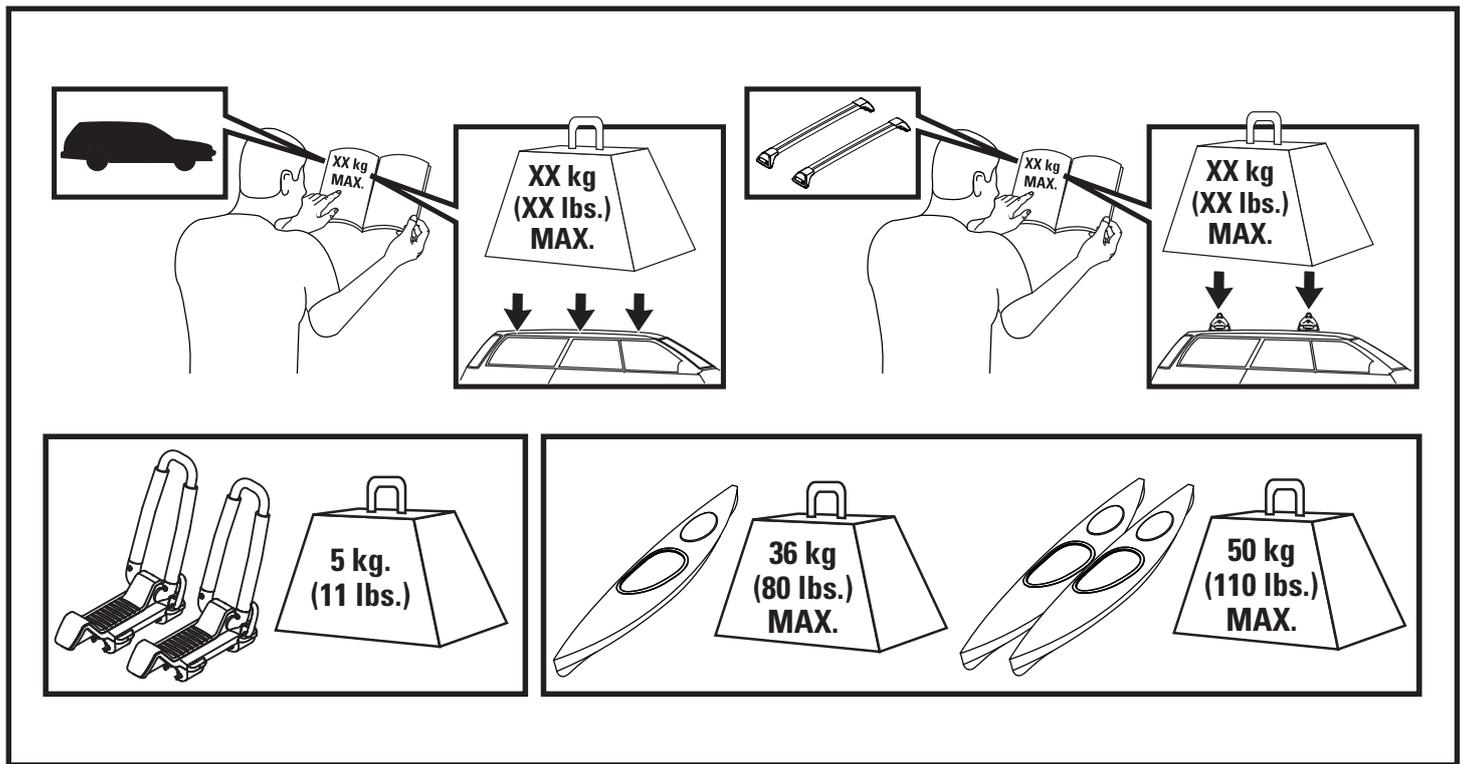

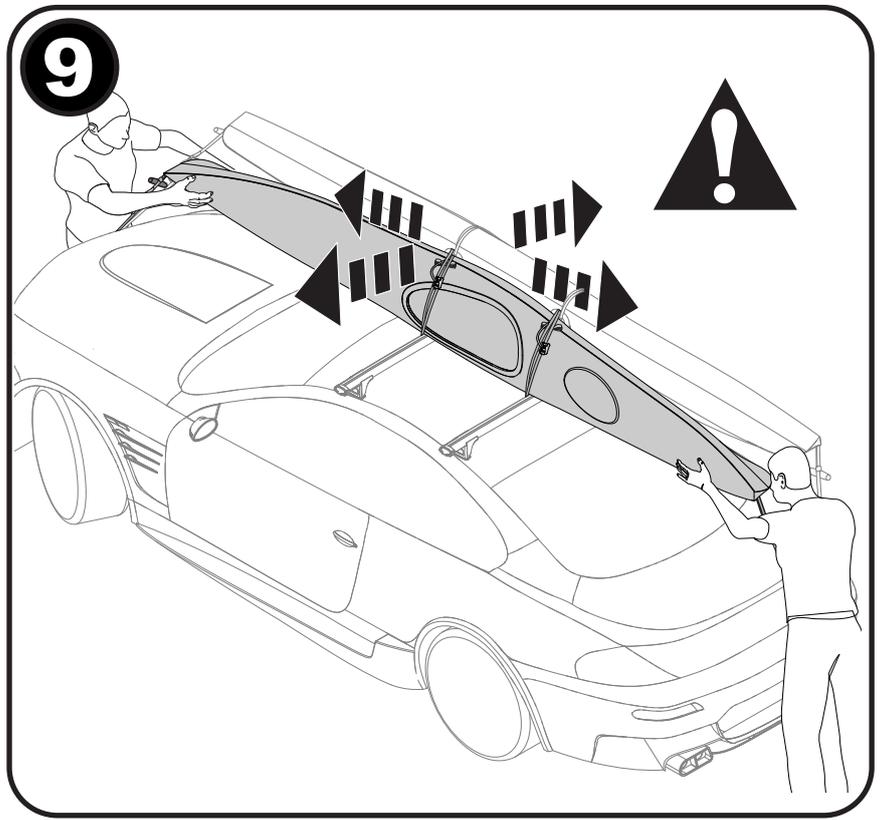

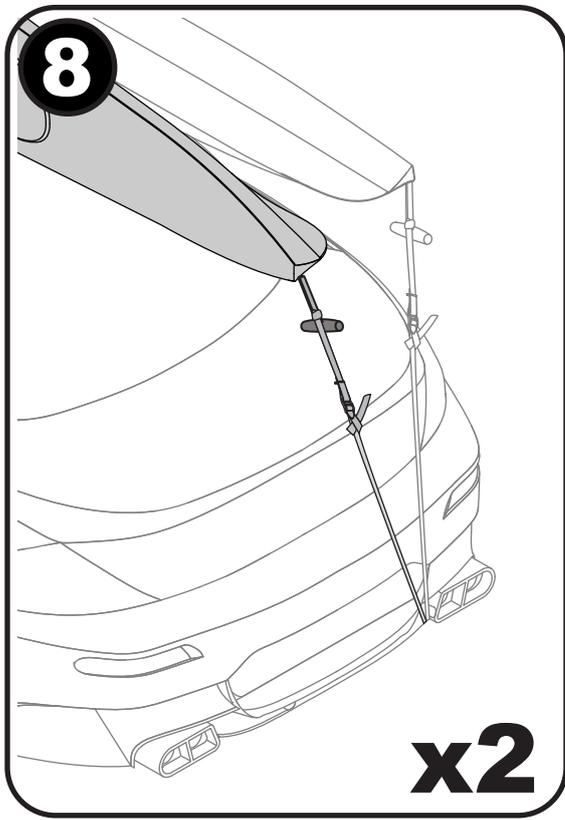

### Heavy Duty Strap #8005006

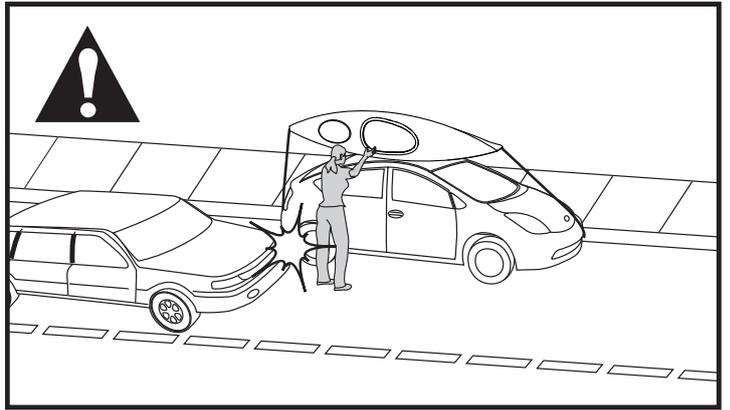

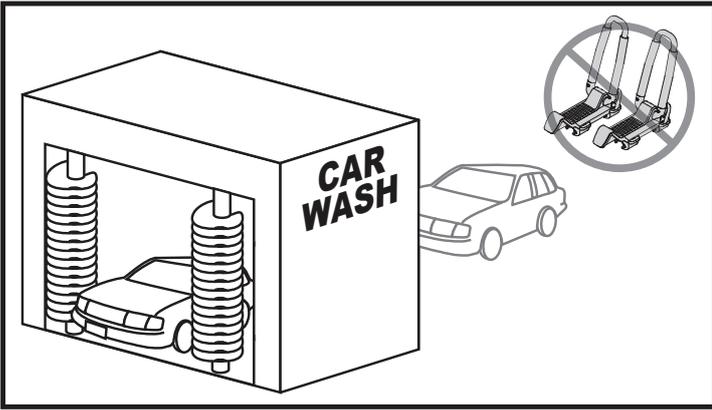

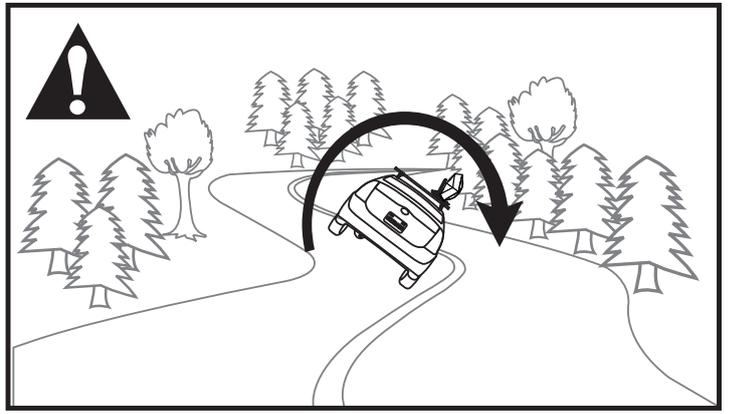

1

A large diagram for measuring the height of a car. It shows two side views of a car. The top view shows the car's roof height. The bottom view shows the car with a roof rack. A vertical scale with tick marks is on the left of each view, with a dashed horizontal line indicating the measurement level. To the right of the bottom view, the text reads "XX m (XX ft.)".

**Record Height Here.**

A large, empty rectangular box with a thick black border, intended for recording the measured height.

## IMPORTANT WARNINGS

### Rack Installation

Inadequately secured loads and incorrectly mounted roof racks and accessory racks can come loose during travel and cause serious accidents! Therefore, installation, handling and use must be carried out in accordance with product and vehicle instructions.

In addition to these instructions, review the mounting instructions for the roof rack and the operating instructions of the vehicle.

These instructions should be kept together with the vehicle's operating instructions and carried in the vehicle when in use and en route.

For your own safety, you should only use roof racks that are authorized for use with your vehicle.

For roof racks that do not specify the distance between the front and rear crossbars, the distance shall be at least 700mm or as large as possible. Please note that changes (e.g. additional drill holes) to the accessory rack's attachment system are not permissible.

Check attachment hardware and load for tight fit and function:

- Before the start of any journey.
- After driving a short distance following rack or load install.
- At regular intervals on longer journeys.
- More frequently on rough terrain.
- After interruption of a journey during which the vehicle was left unsupervised. (check for damage due to outside intervention)

### Rack Loading

Do not exceed the maximum load specified for the roof rack, accessory rack or the maximum load recommended by the vehicle manufacturer.

**Max Roof Load = weight of roof rack + weight of accessory racks + weight of load.**

Load shall be uniformly distributed with the lowest possible center of gravity.

Load should not substantially extend beyond the loading surface of the roof rack.

### Boat Loading

Use all provided straps to secure the boat in accordance with the instructions.

Bow and stern tiedown lines must be used!

### Vehicle Driving and Regulations

The speed driven must be suited to the load transported and to official speed limits. In the absence of any speed limits, we recommend a maximum speed of 80mph (130 km/h).

When transporting any load, the speed of the vehicle must take into account all conditions such as the state of the road, the surface of the road, traffic conditions, wind, etc. Vehicle handling, cornering, braking and sensitivity to side winds will change with the addition of roof top loads.

Off-road driving is not recommended and could result in damage to your vehicle or your gear.

### Maintenance

The accessory rack should be carefully cleaned and maintained, particularly during the winter months. Use only a solution of water and standard car wash liquid without any alcohol, bleach or ammonium additives.

For reasons of fuel economy and the safety of other road users, the accessory rack and roof rack should be removed when not in use.

Periodically inspect accessory rack for damage. Replace lost, damaged or worn parts. Use only original spare parts obtained from a stocking specialist, dealer or manufacturer.

Any changes made to the roof racks and accessory racks as well as the use of spare parts or accessories other than those supplied by the manufacturer will lead to the lapsing of the manufacturer's warranty and liability for any material damage or accidents. You should observe these instructions to the letter and only use the original parts supplied.

In order to replace any lost or defective keys, note the lock and key numbers below and register them at [www.yakima.com](http://www.yakima.com).

Record Your Key Number:  
(located on the set of  
locking keys)
