2

REMOVE RAIL HARDWARE

Once the lining has been removed, unscrew the factory nuts to remove the roof rails. There are 4x each side of vehicle, close to curtain airbag.

Nuts to be removed with 10mm socket wrench.

DO NOT DISCARD NUTS

3

REMOVE RAILS

Carefully lift roof rails x2 directly upwards and remove from the roof.

4

CLEAN ROOF

Wipe clean any dirt that may have built up in and around all mounting holes.

5 FILL IN THE FRONT HOLES

Fill in the front holes with 2 Button Head Capscrews.

6 AFFIX FOAM ADHESIVE

Apply Foam Adhesive over remaining 8 mounting holes in the vehicle's fixed points, with adhesive side to vehicle.

7 APPLY LOCTITE

Liberally apply the supplied Loctite 598 to the inside surface and on top of each hole **on one side of vehicle**.

8 POSITION RUGGEDLINE ON VEHICLE ROOF

Referring to the left-right orientation on top of each Spine, carefully place one side of the RuggedLine onto vehicle roof as shown. Line up the mounting holes on the bottom tabs to those exposed on the roof. The tabs are to face in towards the vehicle.

10 TIGHTEN BOLTS

Using the socket wrench hold the bolt in place while screwing from above.

11 TIGHTEN RUGGEDLINE HARDWARE

Using the 5 mm T Handle Ball End Allen Key, and avoiding damage to the powder coat, start to carefully secure the RuggedLine by tightening the M6 Socket Head Capscrews to 7 Nm into the mounting holes in roof.

12 REPEAT STEPS ON OPPOSITE SIDE

Repeat steps 6-10 on pages 3 for securing opposite side of RuggedLine Spine.

Ensure both Spines are securely positioned on vehicle roof. Check each screw is secure before proceeding to install LockNLoad Platform to RuggedLine Spines.

REPLACE ROOF LINING

13

REFIT ROOF LINING (RECOMMENDED PROFESSIONALS ONLY)

SECURE PIVOT BRACKET ASSEMBLIES

Tighten all Capscrews with the provided 6 mm T Handle Ball End Allen Key, and all Nuts with a 13 mm Spanner or a suitable Torque Wrench.

Ensure all Capscrews and Nuts are tightened to 7 Nm.

16**INSTALL PLATFORM PIVOT MOUNTS**

From the LockNLoad Platform kit (sold separately), position Pivot Mounts into each Pivot Bracket Assembly, lining up the rivnut holes on the Mounts with the holes on the brackets.

Where possible, always use the centre holes for attaching to Pivot Bracket. If extra clearance is needed due to Platform-to-roof fitment needs, the offset holes can be used.
